

MINERAL SPRING ESSENCE

Mineral Spring Essence

Blended Mineral Pool Salts for your swimming pool.

Mineral Spring Essence

Blended Mineral Pool Salts with Magnesium, Potassium and Sodium

It is said all life evolved from the sea – so it's little wonder we find salt water the most natural medium to swim in.

Sodium Chloride (sea salt) has long been used in swimming pools in conjunction with Salt Chlorinators to purify and disinfect the water. Added in concentrations that produce a salinity level similar to a tear drop, pool owners have found the Salt Chlorinated pool comfortable and invigorating to swim in.

Although not widely reported in health magazines, Sodium Chlorine is an essential part of the body's metabolism, protecting cell walls and helping to maintain the body's fluid and pH balance.

Magnesium and Potassium have widely reported health benefits. Magnesium Oil is widely used as a skin rejuvenation therapy. As far back as the Bronze Age, humans have travelled to mineral springs for health reasons.

Health benefits attributed to Magnesium and Potassium include protection of cells against aging, protection against heart disease, lowering blood pressure and health of the skin. Potassium works in conjunction with Sodium to lower anxiety and stress and increase muscle strength. For people with a dietary deficiency in these minerals, AstralPool's Mineral Pool Salts may be beneficial and improve the overall health of your family.

- Mineral Spring Pool Salts are suitable for use with salt chlorinators that operate at 3000 to 4000ppm salinity. pH must be maintained between 7.2 and 7.6.
- Suitable for use with all Cartridge & Sand or Glass Media filters.
- Recommended dosage is 3.5 to 4 kg Mineral Spring Pool Salt to 1000 litres of water. Do not exceed 4 kg per 1000 litres of water.

Available from:

Mineral Spring Essence does not dissipate or evaporate. Replenishment is only required after your pool is diluted with fresh water.

The choice of water quality for new pools has expanded with the addition of the Mineral Spring Essence, existing pools can also be transformed into a Mineral Spring, just ask your local AstralPool retailer.

AstralPool are committed to reducing Water Usage and Energy consumption and reducing the cost of pool ownership.

The Mineral Spring Essence works with any AstralPool Salt Chlorinator which reduces the need to add cost to any level of pool equipment. Combined with the revolutionary Viron P-300 3 speed pump savings of up to 70% over conventional pumps are achieved. And teamed up with a Viron CL – Series Cartridge Filter cleaning frequency is reduced to as little as once a year which eliminates the unnecessary backwashing of up to 12,000 litres (based on industry standard backwashing of a media filter once per month) of water per year, not to mention the cost of re-introducing extra Minerals to replenish backwashed water.

The AstralPool Viron range of products is perfect for any homeowner desiring to save Money, Energy, Water and of course Time. Now combined with Mineral Spring Essence pool salt you have more time to enjoy your pool in the same manner as visiting a health Spring.

Contact your local AstralPool retailer or visit astralpool.com.au for further details on the Mineral Spring Pool Salt.
