Rola Chem chemical dosing

Swimming Pool Maintenance Made Easy. Rola Chem chemical dosing controllers provide ongoing and continuous sanitiser or pH management of your pool or spa so that it always looks great and is safe and comfortable to swim in. Developed and manufactured in Australia for over 30 years, Rola Chem controllers are designed to treat water in one of the world's harshest environments for pools and spas. The RC 1 series of controllers provide semi automatic control and metered dosing sanitiser and pH adjuster to reduce the day to day attention and maintenance of your pool or spa.

Rola Chem RC-1 Series

Pool or spa ownership should be a pleasure. Yet the need for daily sanitiser and water balance maintenance

to keep the water algae and bacteria free can make it a chore.

Rola Chem metered dosing systems help significantly reduce the time and effort required in the management of your pool water.

The relationship between the pH of your pool or spa water and the effectiveness of the sanitiser is very important. In most cases, for the sanitiser to be effective, it needs to operate in a narrow band of pH.

By using a carefully designed and engineered (peristaltic) pump, Rola Chem dosing systems pump accurate amounts of chlorine, (or any liquid sanitiser) or pH adjuster

into the pool or spa to maintain clean, healthy and balanced water - automatically.

Saves Operating Costs

Manual dosing of chlorine, bromine or other sanitiser or Acid to adjust the pools pH can be virtually eliminated.

The gradual dosing of sanitiser and pH adjuster by your Rola Chem also significantly reduces your total chemical usage and saves as much as 30% of your chemical costs. Automatic dosing of your chemicals avoids the peaks and troughs caused through manual dosing.

Easy to Install and Operate

Simply connect the feeder tube into your drum of Sanitiser or pH adjuster, set the control dial on the front of the unit and the liquid is automatically dosed to the water.

A simple check of the sanitiser level or pH of your water will determine the level the dial is set at.

The RC-1 is available with various metered pump sizes to handle small spa pools up to commercial or resort sized swimming pools.

Built to Last

And 30 years of design and application experience in one of the harshest and most varied climates in the world, means you can rely on your Rola Chem metered dosing system to give you reliable service for years.

Your RC-1 series dosing system significantly reduces the "chore" and helps make your pool or spa a pleasure.

Warranty

The RC-1 is covered by a one year warranty against defects and faulty manufacture and supported by one of the most extensive service networks in Australia. (refer to operating instructions Hurlcon's web site for full details, terms and conditions of warranty).

Specifications:

Model	Litres Sanitiser per minute	Max RPM Chlorine Pump	Litres Acid per minute	Max PRM Acid Pump	Pool Size (litres)
RC1 5/0	0.1-0.9	5	N/A	N/A	80,000
RC1 0/1	N/A	N/A	0.02 - 0.2	1	80,000
RC1 5/1	0.1-0.9	5	0.02 - 0.2	1	80,000
RC1 20/0	0.8-3.0	20	N/A	N/A	240,000
RC1 0/5	N/A	N/A	0.1 - 0.9	5	240,000
RC1 20/5	0.8-3.0	20	0.1 - 0.9	5	240,000
RC1 100/0	3.0-15	100	N/A	N/A	750,000
RC1 0/20	N/A	N/A	0.8 - 3.0	20	750,000
RC1 100/20	3.0-15	100	0.8 - 3.0	20	750,000

Pool size is a guide only - heated water, bather load, location, weather conditions affect chlorine demand and pH. If in doubt, select larger model or contact you local Hurlcon office.
