- Maximum performance and ease of operation
- Compact design for easy installation
- Optional Genus IV Control System

# MX Series

## Spa Pack

Hurlcon Spa Packs are the ultimate in hassle free and economical spa operation. This range is designed to fit a wide variety of applications and budgets from a simple six jet spa pool to the most sophisticated 50 plus jet spa pool.

Its size, capacity and supreme performance makes this product the flagship of the Hurlcon range and ensures the most luxurious of spa experiences keeping you cool and refreshed on hot summer days whilst warm and cosy on those chilly winter evenings.

Each Spa Pack includes a MX Series Gas Heater, a full injection moulded QX Cartridge Filter, and a TX Series pump. These components are precisely matched to ensure maximum performance and ease of operation.

- Hurlcon **MX Gas Heaters** combine high performance, energy efficiency and compact design to ensure faster heating of your pool or spa at the lowest cost.
- The **TX Series Pump** is Hurlcon's premier pump designed to operate at high performance where high flow and high pressure is required.
- The **QX Cartridge Filter** is extremely effective in keeping the water crystal clear. The high quality element works by filtering fine particles without embedding them in the element.

### BUILT TO LAST

MX Spa Packs are an economical, reliable and durable choice, built to meet the needs of those who demand a spa system which will function smoothly and correctly every time, at any temperature desired. Its heavy duty construction, solid engineering and large robust pump is designed to be long wearing, giving you the security of knowing you will be kept cool on scorching summer days and warm on those cold winter evenings for many years to come.

### EASY 50MM CONNECTIONS

Connection and disconnection of the Spa pack is made easy via the quick disconnect barrel unions and the use of 50mm plumbing throughout. This standardization also ensures the least resistance and maximum performance is achieved from your spa.

### WARRANTY

Limited five years on heater parts, 12 months on field labour.  
 Limited three years on all pump components.  
 Limited five years on filter tanks, 12 months on other filter components.

Hurlcon is Australia's most diverse manufacturer of pumps, heaters, filtration, control equipment for pool and spa, and residential and commercial heating & cooling equipment.

### OPTIONAL GENUS IV CONTROL

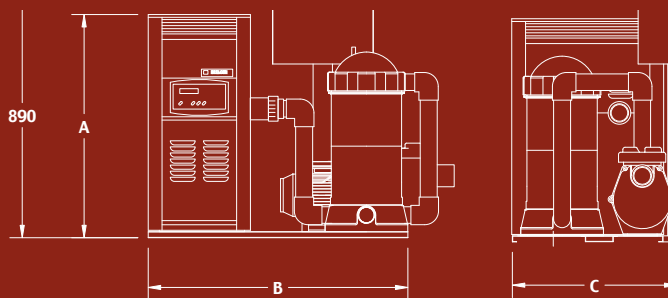

### GENUS IV CONTROL FOR EASY USE

Hurlcon's Genus IV Pool and Spa Control System is the ultimate in hassle free Pool and Spa control and the perfect accessory for any Hurlcon MX Spa Pack.

All Hurlcon Heaters incorporate Genus IV software control to operate a complete swimming pool or spa system. The Control System (sold separately) operates the filter pump, heater temperature, and two auxiliary functions all from electronic touch button controls from within your house or pool / spa side.

Fitted directly to the Spa Pack for easy installation, (see photo above) the Genus IV Control System is extremely easy to operate, providing simplicity in the setting of your pool and spa equipment.
